Research Summary

My research interest sits broadly at the intersection of Human-Computer Interaction (HCI), Computer-Supported Cooperative Work (CSCW), and Accessible Computing, with a focus on studying and designing for accessible collaborative content production in ability-diverse teams, i.e., teams involving people with and without disabilities. Methodologically, I take a human-centered, community-based research approach that involves in-depth qualitative studies (e.g., contextual interviews, observations, long-term fieldwork) followed by the iterative design, development, and evaluation of new systems. As a researcher and educator, my broader goal is to enhance accessibility and inclusion through computing and contribute towards reducing equity gaps in education, employment, and creative work.
